

Data Science Project proposal

COMPUTER PRICE

My data science projects deal with data in the project on a computer that includes (price , speed,hd,ram,screen,cd,multi,premium,ads,trend) In our project we carry out operations on computer prices,which specifications at which price in which year, what is the price of duplicating data and displaying data among the functions used above the data are: (duplicate,drop,shape,head,read, Describe, title,info,split, train, test,predict,accuracy...) For example: delete duplicate data and display data prediction...

Them work : **Naqibulla** and **Fazluddin**
